Dear Mr. Golden:

From: Paul W. Moore, CEO & Exec. VP
Citizens Bank & Trust Co
Atwood, TN. 38220

Dear Sir:

Thank you for the opportunity to comment on FASB's Exposure Draft: Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities.

I am writing to urge FASB to not go forward with the proposal.

Our bank is located in a rural area with approximately $25,000,000.00 in assets.

The accounting that would result from this proposal would greatly misrepresent the financial condition of our bank and other community banks.

We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation. This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

Community banks such as this bank create and hold small business loans for which there is no active market; it would be very difficult and costly to mark them to market.

Establishing fair values for the types of loans held by many community banks like our bank would be costly and result in data of questionable reliability.

Conservative community bankers (and bank regulators) see the need for more flexibility in setting the allowance for loan and lease losses. We are all well aware that economic cycles occur and it is very difficult to absorbing losses and raising capital during times of economic difficulties, such as the current environment.

These accounting changes will increase the volatility of bank balance sheets, forcing them to face higher capital requirements or decrease lending at a time when regulators are calling for more capital and our economy needs more, not less, credit availability.

Again, we thank your for the opportunity to comment on this proposal.

Sincerely,

Paul W. Moore
