Subject: Re: File Reference No. 1102-100-Opposed to Expesing of Stock Options

Sir.

This is to voice my concern -- I am very strongly opposed to the expensing of stock options. The company I work for has been very generous in allowing all employees in sharing a part of their company by way of periodic stock options. I am a single mother with a home to maintain and the dollars I have had access t through stock options has helped me to make repairs on my home, and pay for my sons schooling at a good university. I would not be able to afford to live in th bay area without the extra funds from stock options.

Letter of Comment No: 5027

File Reference: 1102-100

Thank you.
