Sirs.

To simply put it, FASB is making social engineering to favour or to punish specific groups within this free country, it is only to lead to the ill results of a socialist country.

Please consider to keep what it is today, continue to keep the LAST frontier in Silicon Valley. I will hate to see the

Innovation will be OUT SOURCED like the manufacturing had, like the Software industry has now moving to India/China.

Are you moving the last of our resources off shore as well?
