Subject: Stop killing the Silicon Valley

The stock option raised US from the deep financial hole in 1979-1981. The stock option created the Silicon Valley. It is the feeling that you work for your own account and enterprise that raised the economy and put USA to lead the world. If you rely only on hired labor to work without any enthusiasm and inspiration, some people from the Wall Street will lose much more than they will gain in the short term.

Stop killing the Silicon Valley. There are enough empty buildings and jobless people right now.

P.L.
