September 20, 2010

Russell Golden Technical Director, Financial Accounting Standards Board 401 Merritt 7 P.O. Box 5116 Norwalk, CT 06856-5116

Dear Mr. Golden:

Thank you for the opportunity to comment on FASB's Exposure Draft: Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities. I am a 36 year banker employed as a Senior VP and auditor with Citizens National Bank in Henderson, Texas which is about 120 miles east of Dallas. Our bank is approximately \$850 million in assets serving in 18 branches in the East Texas area with a mix of rural and suburban demographics.

I am writing to urge FASB to not go forward with the proposal.

CNB has always employed a conservative management philosophy and conservative accounting treatments while attempting to ferret through the ever incresing complexity of endless regulatory and accounting changes that negatively impact our number one priority, which is to serve our customers. Constant review and implementation of myriad new and revised regulations and accounting pronouncements take a significant toll on our time and budgets. This is time that could be better spent on our customers.

Theoretical changes in a controlled environment may appear to be of benefit to the consumer but when the real world issues are factored in unintended consequences can result which many times are actually detrimental to the consumer such as increased cost and fewer choices.

The accounting that would result from this proposal would greatly misrepresent the financial condition of our bank and other community banks.

The primary business of community banks is to hold financial instruments to collect contractual cash flows, not to trade them on a regular basis.

Community banks fund their operations by taking deposits and holding loans for the long term. Most financial instruments this bank holds are not readily marketable.

We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation.

This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

We oppose requiring institutions to record demand deposits at fair value.

We also oppose requiring fair value calculations for loans that are held for the long-term to collect cash flows.

Fair value measurements will not provide a better understanding of the values of illiquid agricultural loans held by small banks in rural areas such as this bank.

Community banks such as this bank create and hold small business loans for which there is no active market; it would be very difficult and costly to mark them to market.

Establishing fair values for the types of loans held by many community banks like our bank would be costly and result in data of questionable reliability.

Conservative community bankers (and bank regulators) see the need for more flexibility in setting the allowance for loan and lease losses. We are all well aware that economic cycles occur and it is very difficult to absorbing losses and raising capital during times of economic difficulties, such as the current environment.

Accounting standards and guidance should not be pro-cyclical. Recent market conditions have demonstrated the pro-cyclical nature of mark-to-market accounting as declining values of financial instruments necessitated write-downs and sales, causing further write-downs and sales.

The proposed accounting changes will exacerbate cyclicality in financial results due to the greater reliance on fair value measurements, valuations that will be less accurate than current accounting requirements.

These accounting changes will increase the volatility of bank balance sheets, forcing them to face higher capital requirements or decrease lending at a time when regulators are calling for more capital and our economy needs more, not less, credit availability.

Again, we thank your for the opportunity to comment on this proposal.

Sincerely,

Mike Smith 903 657-1444
