Dear Mr. Golden:

Glen Marsh , SVP
Bank of the Pacific
4124 Hannegan Road
Bellingham, WA 98226

Dear Mr. Golden,

Thank you for the opportunity to comment on FASB's Exposure Draft: Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities.

I am writing to urge FASB to not go forward with the proposal. Given the current economic environment we are concerned about our operating efficiencies. We do not currently have adequate staff resources to implement the proposal, the proposed changes would be costly and I don't believe they would provide meaningful benefit.

Community banks fund their operations by taking deposits and holding loans for the long term. Most financial instruments this bank holds are not readily marketable.

We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation. This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

We oppose requiring institutions to record demand deposits at fair value.

We also oppose requiring fair value calculations for loans that are held for the long-term to collect cash flows.

The expanded reporting of comprehensive income is unnecessary, confusing and of little use to most financial statement users.

The proposed accounting changes will exacerbate cyclicity in financial

results due to the greater reliance on fair value measurements, valuations that will be less accurate than current accounting requirements.

These accounting changes will increase the volatility of bank balance sheets, forcing them to face higher capital requirements or decrease lending at a time when regulators are calling for more capital and our economy needs more, not less, credit availability.

Again, we thank you for the opportunity to comment on this proposal.

Sincerely,

Glen Marsh
