Re: File Reference: No. 1810-100, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities"

Dear Mr. Golden:

Thank you for the opportunity to comment on the exposure draft, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities."

As Chief Financial Officer of Firstrust Bank, a banking institution in Conshohocken, PA with 2.5 billion in total assets, I am writing to express my opinions on specific provisions of the exposure draft.

I. COMMENTS ON FAIR VALUE

We are strongly opposed to the portion of the proposal that requires all financial instruments – including loans – to be reported at fair value (market value) on the balance sheet. This provision will likely further contribute to the volatility of reported earnings and increase confusion in the understanding of financial statements. Furthermore it adds materially to the time component of preparing financial statements. We view this proposal as misguided and wrong.

An example of our objection is relevant. Firstrust Bank does not sell commercial loans. Basing our balance sheet on fair values leads readers of our financial statements to assume that we will sell the loans, which is not the case. If there are issues with a borrower's ability to repay a loan, we work through the collection process with the borrower rather than sell the loan. There is no active market for many of our loans, and estimating a market value makes no real sense.

Even if we could easily obtain a market price, since the loan is just one part of the financial relationship that we have with the customer (multiple loans, investment and trust services, etc.), there is no financial incentive to sell. Marking all loans to market would cause our bank's capital to sway with fluctuations in the markets – even if the entire loan portfolio is performing. Instead of providing better information about our bank's health or its ability to pay dividends, the proposal would mask it.

Even if the banking regulators' Tier 1 capital excludes fair value fluctuations, we still will have to explain it to our investors, customers and depositors. The costs and resources that we will need to comply with this new requirement would be significant. This will require us to pay consultants and auditors to estimate market value. In an already tough economic environment for Banks it is imprudent to layer more complexity and cost now.

II. COMMENTS ON LOAN IMPAIRMENT

We support the Board's efforts to revise the methodology to estimate loan loss provisions. However, I have serious concerns about how such changes can be implemented by banks like mine. I recommend that any final model be tested by banks my size in order to ensure that the model is solid and workable. It is very important that any new processes are agreed upon and well understood by regulators, auditors, and bankers prior to finalizing the rules.

We do not support the proposal for recording interest income. Interest income should continue to be calculated based on contractual terms and not on an after-impairment basis. Changing the way interest income is recorded to the proposed method makes the accounting more confusing and subjects otherwise firm data to the volatility that comes naturally from the provisioning process. I recommend maintaining the current method. At some point we have recognize the complexity we are injecting into our financial statements and simply state, "Enough!"

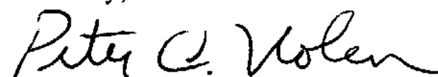
III. COMMENTS ON HEDGE ACCOUNTING

We support the change of the requirement that a hedge is "reasonably effective" (as opposed to being "highly effective"). This should make it easier for banks like mine to implement hedge accounting. However it is very important that the term "reasonably effective" be better defined.

The "shortcut" and the "critical terms match" methods should be maintained. This greatly helps medium and smaller banks reduce the cost of compliance with the hedge accounting rules.

Thank you for considering my comments.

Sincerely,



Peter Nolan
EVP, Chief Financial Officer
Firstrust Bank
