Russell Golden Technical Director Financial Accounting Standards Board 401 Merritt 7 P.O. Box 5116 Norwalk, CT 06856-5116

Dear Mr. Golden:

Thank you for the opportunity to comment on the exposure draft, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities."

As a banker with 54 years of banking experience, most rececnt with Polk County Bank]], a banking institution in Johnston, Iowa, with \$113,000,000 in total assets, I am writing to express my opinions on specific provisions of the exposure draft.

I am strongly opposed to the portion of the proposal that requires all financial instruments - including loans - to be reported at fair value (market value) on the balance sheet.

Our bank does not sell our commercial loans. Basing our balance sheet on fair values leads readers of our financial statements to assume that we will sell the loans, which is not the case.

If there are issues with a borrower's ability to repay a loan, we work through the collection process with the borrower rather than sell the loan.

Even if we could easily obtain a market price, since the loan is just one part of the financial relationship that we have with the customer (multiple loans, investment and trust services, etc.), there is no financial incentive to sell.

Marking all loans to market would cause our bank's capital to sway with fluctuations in the markets - even if the entire loan portfolio is performing. Instead of providing better information about our bank's health or its ability to pay dividends, the proposal would mask it.

The costs and resources that we will need to comply with this new requirement would be significant. This will require us to pay consultants and auditors to estimate market value.

For the reasons stated above, our bank respectfully requests that the fair value section of the exposure draft be dropped.

1810-100 Comment Letter No. 2776

I support the Board's efforts to revise the methodology to estimate loan loss provisions. However, I have serious concerns about how such changes can be implemented by banks like mine.

I recommend that any final model be tested by banks my size in order to ensure that the model is solid and workable.

It is very important that any new processes are agreed upon and well understood by regulators, auditors, and bankers prior to finalizing the rules.

I do not support the proposal for recording interest income. Interest income should continue to be calculated based on contractual terms and not on an after-impairment basis.

Sincerely,

Richard Pedersen 515-223-9565
