Subject: File Reference No. EITF-13B

I am a buy-side analyst with an investment management firm and as part of my role I evaluate firms which have an interest in Low Income Housing Tax Credits (LIHTC). The proposed changes to the accounting methodology for LIHTC seem sensible from the perspective of allowing investors to get a more accurate picture of the return profile for these vehicles. Any changes which result in an improved ability for the investment community to evaluate an investment product is a positive change in my eyes.

Thank you,

Ian Dodd, CFA®
