Director, Financial Accounting Standards Board

Dear Director, Standards Board,

I am writing to support the proposed rules on stock option expensing. Options aren't free money. Simply put, options are a form of non-cash compensation with value to the recipient and a cost to the company. And options are a real cost to all of the public retirement systems and 401(k)s who are companies' major shareholders, taking real money out of our pockets.

The failure to expense stock options distorts reported earnings, leads to excessive executive compensation, and gives executives incentive to manage numbers for short-term gain.

Do the right thing and implement the option expensing rule.

Sincerely,

Robin Lorentzen
