Russell Golden  
Technical Director  
Financial Accounting Standards Board  
401 Merritt 7, PO Box 5116  
Norwalk, CT 06856-5116

Dear Mr. Golden:

Thank you for the opportunity to comment on the exposure draft, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities."

I am strongly opposed to the portion of the proposal that requires all financial instruments - including loans - to be reported at fair value (market value) on the balance sheet.

Our bank does not sell our commercial loans. Basing our balance sheet on fair values leads readers of our financial statements to assume that we will sell the loans, which is not the case.

If there are issues with a borrower's ability to repay a loan, we work through the collection process with the borrower rather than sell the loan.

There is no active market for many of our loans, and estimating a market value makes no real sense.

I support the Board's efforts to revise the methodology to estimate loan loss provisions. However, I have serious concerns about how such changes can be implemented by banks like mine.

I do not support the proposal for recording interest income. Interest income should continue to be calculated based on contractual terms and not on an after-impairment basis.

I support the change of the requirement that a hedge is "reasonably effective" (as opposed to being "highly effective"). This should make it easier for banks like mine to implement hedge accounting.

It is very important that the term "reasonably effective" be better defined.

The "shortcut" and the "critical terms match" methods should be maintained. This greatly helps medium and smaller banks like mine to reduce the cost of compliance with the hedge accounting rules.

Thank you for considering my comments.

Sincerely,

276 466 1000  
AVP
