Dear Mr. Golden:

Thank you for the opportunity to comment on the exposure draft, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities."

As President & CEO of Franklin State Bank and Trust Co., a banking institution in Winnsboro, Louisiana with \$120,000,000 in total assets, I am writing to express my opinions on specific provisions of the exposure draft.

I am strongly opposed to the portion of the proposal that requires all financial instruments - including loans - to be reported at fair value (market value) on the balance sheet.

Our bank does not sell our commercial loans. Basing our balance sheet on fair values leads readers of our f/s to assume that we will sell the loans. That is not the case. Marking all loans to market would cause our bank's capital to sway with fluctuations in the markets - even if the entire loan portfolio is performing. Instead of providing better information about our bank's health or its ability to pay dividends, the proposal would mask it.

Even if the banking regulators' Tier 1 capital excludes fair value fluctuations, we still will have to explain it to our investors, customers and depositors.

The costs and resources that we will need to comply with this new requirement would be significant. This will require us to pay consultants and auditors to estimate market value.

Our investors have expressed no interest in receiving this information. We believe our investors would not view these costs, which must come out of bank earnings, as being either reasonable or worthwhile.

For the reasons stated above, our bank respectfully requests that the fair value section of the exposure draft be dropped.

Thank you for considering my comments.

Sincerely,

3184353711
President & CEO
Franklin State Bank & Trust Co.
