Dear Mr. Golden:

Thank you for the opportunity to comment on the exposure draft, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities."

As Chief Operating Officer of Fidelity Bank a banking institution in Baton Rouge, Louisiana with \$150,000,000 in total assets, I am writing to express my opinions on specific provisions of the exposure draft.

#### I. COMMENTS ON FAIR VALUE

I am strongly opposed to the portion of the proposal that requires all financial instruments - including loans - to be reported at fair value (market value) on the balance sheet.

If there are issues with a borrower's ability to repay a loan, we work through the collection process with the borrower rather than sell the loan.

Even if we could easily obtain a market price, since the loan is just one part of the financial relationship that we have with the customer (multiple loans, investment and trust services, etc.), there is no financial incentive to sell.

Marking all loans to market would cause our bank's capital to sway with fluctuations in the markets - even if the entire loan portfolio is performing. Instead of providing better information about our bank's health or its ability to pay dividends, the proposal would mask it.

The costs and resources that we will need to comply with this new requirement would be significant. This will require us to pay consultants and auditors to estimate market value.

For the reasons stated above, our bank respectfully requests that the fair value section of the exposure draft be dropped.

Thank you for considering my comments.

Sincerely,

225-928-8240  
Executive Vice President and Chief Operating Officer  
Fidelity Bank
