Dear Mr. Golden:

Thank you for the opportunity to comment on FASB's Exposure Draft: Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities.

I am writing to urge FASB to not go forward with the proposal.

The primary business of community banks is to hold financial instruments to collect contractual cash flows, not to trade them on a regular basis.

Community banks fund their operations by taking deposits and holding loans for the long term. Most financial instruments this bank holds are not readily marketable.

We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation. This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

We oppose requiring institutions to record demand deposits at fair value.

We also oppose requiring fair value calculations for loans that are held for the long-term to collect cash flows.

Fair value measurements will not provide a better understanding of the values of illiquid agricultural loans held by small banks in rural areas such as this bank.

Establishing fair values for the types of loans held by many community banks like our bank would be costly and result in data of questionable reliability.

These accounting changes will increase the volatility of bank balance sheets, forcing them to face higher capital requirements or decrease lending at a time when regulators are calling for more capital and our economy needs more, not less, credit availability.

Again, we thank your for the opportunity to comment on this proposal.

Sincerely,

Shively Verrette
