Dear Mr. Golden:

Thank you for the opportunity to comment on FASB's Exposure Draft: Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities. I am writing to urge FASB to not go forward with the proposal. The accounting that would result from this proposal would greatly misrepresent the financial condition of our bank and other community banks. The primary business of community banks is to hold financial instruments to collect contractual cash flows, not to trade them on a regular basis. Community banks fund their operations by taking deposits and holding loans for the long term. Most financial instruments this bank holds are not readily marketable. We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation. This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

Community banks such as this bank create and hold small business loans for which there is no active market; it would be very difficult and costly to mark them to market. Establishing fair values for the types of loans held by many community banks like our bank would be costly and result in data of questionable reliability.

Conservative community bankers (and bank regulators) see the need for more flexibility in setting the allowance for loan and lease losses. We are all well aware that economic cycles occur and it is very difficult to absorb losses and raising capital during times of economic difficulties, such as the current environment. Accounting standards and guidance should not be pro-cyclical. Recent market conditions have demonstrated the pro-cyclical nature of mark-to-market accounting as declining values of financial instruments necessitated write-downs and sales, causing further write-downs and sales. The proposed accounting changes will exacerbate cyclicity in financial results due to the greater reliance on fair value measurements, valuations that will be less accurate than current accounting requirements.

Again, we thank you for the opportunity to comment on this proposal.

Sincerely,

Dwight Kroenke
