Dear Mr. Golden:

Thank you for the opportunity to comment on the exposure draft, "Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities."

As President of Webster City Federal Savings Bank, a banking institution in Webster City, Iowa with \$93,000,000. in total assets, I am writing to express my opinions on specific provisions of the exposure draft.

I. COMMENTS ON FAIR VALUE

I am strongly opposed to the portion of the proposal that requires all financial instruments - including loans - to be reported at fair value (market value) on the balance sheet.

Our bank does not sell our loans. Basing our balance sheet on fair values leads readers of our financial statements to assume that we will sell the loans, which is not the case.

If there are issues with a borrower's ability to repay a loan, we work through the collection process with the borrower rather than sell the loan.

Marking all loans to market would cause our bank's capital to sway with fluctuations in the markets - even if the entire loan portfolio is performing. Instead of providing better information about our bank's health or its ability to pay dividends, the proposal would mask it.

Even if the banking regulators' Tier 1 capital excludes fair value fluctuations, we still will have to explain it to our investors, customers and depositors.

The costs and resources that we will need to comply with this new requirement would be significant. This will require us to pay consultants and auditors to estimate market value.

For the reasons stated above, our bank respectfully requests that the fair

value section of the exposure draft be dropped.

II. COMMENTS ON LOAN IMPAIRMENT

I support the Board's efforts to revise the methodology to estimate loan loss provisions. However, I have serious concerns about how such changes can be implemented by banks like mine.

I recommend that any final model be tested by banks my size in order to ensure that the model is solid and workable.

It is very important that any new processes are agreed upon and well understood by regulators, auditors, and bankers prior to finalizing the rules.

recording interest income. Interest income should continue to be calculated based on contractual terms and not on an after-impairment basis. I do not support the proposal for

Changing the way interest income is recorded to the proposed method makes the accounting more confusing and subjects otherwise firm data to the volatility that comes naturally from the provisioning process. I recommend maintaining the current method.

Thank you for considering my comments.

Sincerely,

President/CEO/
Webster City Federal Savings Bank
