Dear Mr. Golden:

Thank you for the opportunity to comment on FASB's Exposure Draft: Accounting for Financial Instruments and Revisions to the Accounting for Derivative Instruments and Hedging Activities.

As a small, \$100 million dollar community bank, I am writing to ask FASB not to implement this accounting proposal. The requirements and changes proposed would result in the misrepresentation of the financial condition of our bank, and the cost-benefit of the proposal would be detrimental considering smaller banks like ours have limited staff resources to conduct the analysis.

The primary business of community banks is to hold financial instruments to collect contractual cash flows, not to trade them on a regular basis.

Community banks fund their operations by taking deposits and holding loans for the long term. Most financial instruments this bank holds are not readily marketable.

We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation. This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

We oppose requiring institutions to record demand deposits at fair value.

We also oppose requiring fair value calculations for loans that are held for the long-term to collect cash flows.

Conservative community bankers (and bank regulators) see the need for more flexibility in setting the allowance for loan and lease losses. We are all well aware that economic cycles occur and it is very difficult to absorbing losses and raising capital during times of economic difficulties, such as the current environment.

These accounting changes will increase the volatility of bank balance

sheets, forcing them to face higher capital requirements or decrease lending at a time when regulators are calling for more capital and our economy needs more, not less, credit availability.

Again, we thank your for the opportunity to comment on this proposal.

Sincerely,

Tonya Gilbert
