Re: Statement of Financial Accounting Standard No. 150—Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity

Dear Mr. Herz:

The National Association of Real Estate Investment Trusts® (NAREIT®) is writing to the Financial Accounting Standards Board (the Board) to urge the Board to reconsider certain aspects of Statement of Financial Accounting Standard No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity (SFAS 150). NAREIT is the national trade association for real estate investment trusts (REITs) and other publicly traded real estate companies. Members include REITs and other businesses that develop, own, operate, and finance income-producing real estate, as well as those firms and individuals who advise, study, and service these businesses.

As currently being interpreted, SFAS 150 will significantly impact the real estate industry. The implications of SFAS 150 have only recently become clear to the industry as member companies began to implement the standard. Further, the impacts of SFAS 150 on the industry’s financial reporting will be exacerbated by the implementation of FASB Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46), which will increase the extent to which the industry will be required to report minority interests in consolidated entities.

Many real estate companies invest in entities that are organized in a partnership structure (or “partnership-like” structure such as a limited liability company). By practice, or as required by certain state reporting statutes, these entities often have finite lives, frequently extending 99 years, and providing for further extension. When a real estate company controlled the jointly owned entity, the assets and liabilities of such entities were consolidated and the non-owned investor’s portion
were reflected in the mezzanine section of the balance sheet as minority interest. Prior to the
issuance of SFAS 150, these minority interests reflected the book value of the minority partners’
claim on the net assets of the consolidated entity.

We understand that pursuant to the provisions of paragraph 9 of SFAS 150, effective in the third
quarter of 2003, the jointly-owned consolidated entities described above may meet the definition
of mandatorily redeemable financial instruments. They would therefore be required to be
reported as liabilities and measured at their fair value at each balance sheet date. Further, the
changes to the fair value would be included in the parent’s operating results for the periods in
which the change occurs. This accounting would not result in financial reporting that faithfully
represents the economics of a parent company’s interest in consolidated jointly owned entities.

The great majority of these jointly owned entities provide the minority party with a residual
interest in the final liquidation of the net assets of the entity that is included in the consolidated
financial statements of the parent. If these entities are consolidated in the financial statements of
their parent, SFAS 150 would produce an anomalous result of requiring the minority interest
liability to be adjusted to settlement value based on the fair value of the jointly owned entity’s
underlying assets that continue to be carried at historical cost in the consolidated financial
statements. Said more simply, the very changes in asset value that create the recognized
adjustments to the SFAS 150-minority interest liability would not be themselves reflected in the
parent’s consolidated financial statements. Therefore, if the value of an investment property held
by a consolidated jointly owned entity, increases by $10 million and 30% accrues to the minority
interest, the parent would increase the minority interest liability and charge earnings for $3
million. At the same time, neither the $10 million nor the $3 million increase in the value of the
underlying asset would be recognized in the parent’s consolidated financial statements. This
result would misrepresent the economic reality of the parent’s interest in the jointly owned entity
and the parent’s operating results.

We request that the Board urgently address this inappropriate financial reporting result. Many of
NAREIT’s member companies are attempting to implement SFAS 150 for the third quarter of
2003. We believe that, at the very least, the Board should defer the application of SFAS 150 to
those liabilities that represent residual interests with the right to participate in the final
liquidation of the net assets of an entity that is included in the consolidated financial statements.

NAREIT appreciates the opportunity to continue to participate in Board’s standard setting
process. This comment letter has been reviewed and approved by NAREIT’s Best Financial
Practices Council. If you have any questions regarding this response, please contact Gaurav
Agarwal at (202) 739-9442 or me at (202) 739-9432.

Sincerely,

George L. Yungmann
Vice President, Financial Standards
