All respondents:

3. a) Tell us about any issues or concerns you have with current U.S. GAAP accounting standards as those standards apply to private company financial statements.

b) Are those issues or concerns confined to one or more specific standards, or are they more systemic?

c) Do you believe that those issues or concerns are largely confined to private companies, or are they broader?

Please be as specific as possible in your answers.

Fair Value emphasis – The overall direction and focus of GAAP towards fair value has negatively impacted the reliability and comparability of financial statements.

Complexity – Much of which is driven by the fair value emphasis, has created substantial additional cost to the preparation of private company financial statements which exceed their benefit.

4. What short-term and/or long-term actions do you believe are necessary to address those issues or concerns? Please be as specific as possible in your answer, and explain your reasoning.

Serious consideration to developing two sets of GAAP standards (public v. private) should be given. Private companies should be allowed to opt for
either and report accordingly.
