Norwalk, CT 06856-5116

Dear Mr. Golden:

I am writing to urge FASB to not go forward with the proposal.

The accounting that would result from this proposal would greatly misrepresent the financial condition of our bank and other community banks.

Community banks fund their operations by taking deposits and holding loans for the long term. Most financial instruments this bank holds are not readily marketable.

We oppose the proposed accounting treatment for core deposits which calls for them to be regularly remeasured using a present value calculation. This would not provide accurate information and the calculations would be expensive and time consuming, particularly for smaller banks like ours that have limited staff resources to conduct the analysis.

We oppose requiring institutions to record demand deposits at fair value.

We also oppose requiring fair value calculations for loans that are held for the long-term to collect cash flows.

Fair value measurements will not provide a better understanding of the values of illiquid agricultural loans held by small banks in rural areas such as this bank.

Establishing fair values for the types of loans held by many community banks like our bank would be costly and result in data of questionable reliability.

The expanded reporting of comprehensive income is unnecessary, confusing and of little use to most financial statement users.

Conservative community bankers (and bank regulators) see the need for more flexibility in setting the allowance for loan and lease losses. We are all well aware that economic cycles occur and it is very difficult to absorbing losses and raising capital during times of economic difficulties, such as the current environment.

The proposed accounting changes will exacerbate cyclicality in financial results due to the greater reliance on fair value measurements, valuations that will be less accurate than current accounting requirements.

Again, we thank you for the opportunity to comment on this proposal.

Sincerely,

Robert Ares
