

TAXONOMY IMPLEMENTATION GUIDE

Version 5.1

May 2018

Other Comprehensive Income (including selected financial statements)

(Taxonomy Version 2018[†])

FASB U.S. GAAP Financial Reporting Taxonomy (Taxonomy) Implementation Guide Series

[†] Changes from the 2017 version of this Implementation Guide are included in Appendix A to this Guide.

Financial Accounting Standards Board

The Taxonomy Implementation Guide is not authoritative; rather, it is a document that communicates how the U.S. GAAP Financial Reporting Taxonomy (Taxonomy) is designed. It also provides other information to help a user of the Taxonomy understand how elements and relationships are structured.

Taxonomy Implementation Guide on Modeling Other Comprehensive Income

Overview

The purpose of this Taxonomy Implementation Guide is to demonstrate the modeling of transactions related to changes in accumulated other comprehensive income (AOCI), including reclassifications out of accumulated other comprehensive income. The guide also contains selected financial statements to illustrate the modeling of the values for AOCI and other comprehensive income (OCI) that may overlap with values in the disclosures. Generally, the primary financial statements are modeled using line item elements and the disclosures use a dimensional modeling which follows the Statement of Stockholders' Equity. The examples in this Taxonomy Implementation Guide are not intended to encompass all of the potential modeling configurations or to dictate the appearance and structure of an entity's extension taxonomy. The examples are provided to help users of the U.S. GAAP Financial Reporting Taxonomy (Taxonomy) understand how the modeling for changes to AOCI components is structured within the Taxonomy. The examples are based on the assumption that the entity meets the criteria for reporting AOCI under U.S. GAAP and/or SEC authoritative literature. In addition, the reported line items within the examples are not all inclusive and represent only partial statements for illustrative purposes.

While constituents may find the information in this guide useful, users looking for guidance to conform to SEC XBRL filing requirements should look to the SEC EDGAR Filer Manual and other information provided on the SEC website at xbrl.sec.gov.

This guide focuses on detail tagging only (Level 4); it does not include any elements for text blocks, policy text blocks, and table text blocks (Levels 1–3).

The Taxonomy Implementation Guide includes the following three sections:

- **Section 1: Overview of Other Comprehensive Income Taxonomy Element Attributes:** This section provides an overview of other comprehensive income Taxonomy element attributes.
- **Section 2: Primary Financial Statements to Accompany Disclosures:** This section provides examples to illustrate the values in the primary financial statements that relate to values in the notes to the financial statements.
 - Example 1—[Consolidated Statements of Comprehensive Income and Consolidated Statements of Income](#)

- Example 2—[Consolidated Statements of Financial Position](#)
 - Example 3—[Consolidated Statements of Stockholders' Equity](#)
-
- **Section 3: Modeling of Disclosures for Changes in Accumulated Other Comprehensive Income and Related Tax Effects:** This section provides examples of modeling the changes in AOCI, reclassifications out of AOCI and tax effects on OCI in the notes to the financial statements:
 - Example 4—[Disclosure of Changes in Accumulated Other Comprehensive Income \(Loss\)](#)
 - Example 5—[Disclosure of Amounts Reclassified Out of Accumulated Other Comprehensive Income \(Loss\)](#)
 - Example 6—[Disclosure of Tax Effects on Other Comprehensive Income \(Loss\)](#)

General Information

- (1) A legend for dimensions and domain members has been provided to associate with facts contained in the examples. Extension elements are coded using “Ex.” Legends specific to the examples are provided in Figure x.2 of each example.

- (2) Elements that have instant period type and elements that have duration period type are indicated as such in Figure x.2 of each example. Instant elements have a single date context (such as December 31, 20X1) while duration elements have a starting and ending date as their context (such as January 1, 20X1 to December 31, 20X1).
- (3) Instance documents (Figure x.3 in each example) do not include all information that may appear in an entity's instance document. It is provided for illustrative purposes only.
- (4) For elements contained in the Taxonomy, the standard label is as it appears in the Taxonomy. For extension elements, the standard label corresponds to the element name. For information about structuring extension elements, refer to the *EDGAR Filer Manual*.
- (5) Values reported in XBRL are generally entered as positive, with the exception of certain concepts such as net income (loss) or gain (loss).
- (6) Elements labeled with an asterisk (*) will be available in 2019 Taxonomy.
- (7) Information has been provided to illustrate the XBRL value for two-way elements in certain examples. These are contained in Figure x.4 of those examples. Below is a description of the items used in the value determination that is common to the examples.

Positive XBRL value for:	Negative XBRL value for:	Description:
Accumulated Earnings	(Accumulated Deficit)	For values reported as an accumulation of earnings, the XBRL value will be positive. For values reported as an accumulation of deficits, the XBRL value will be negative.
Asset Reclassification	(Obligation) Reclassification	For defined benefit plans with values reported as a transition asset, the XBRL value will be positive. For values reported as a transition obligation, the XBRL value will be negative.
Cost	(Credit)	For defined benefit plans with values reported as a cost, the XBRL value will be positive. For values reported as a credit, the XBRL value will be negative.
Cost Reclassification	(Credit) Reclassification	For values that are a reclassification of a cost, the XBRL value will be positive. For values that are a reclassification of a credit, the XBRL value will be negative.
Expense	(Reversal of Expense)	For values reported as an expense, the XBRL value will be positive. For values reported as a reversal of an expense, the XBRL value will be negative.
Expense Reclassification	(Reversal of Expense) Reclassification	For values that are a reclassification of an expense, the XBRL value will be positive. For values that are a reclassification of a reversal of an expense, the XBRL value will be negative.
Gain	(Loss)	For values reported as a gain, the XBRL value will be positive. For values reported as a loss, the XBRL value will be negative.
Gain Reclassification	(Loss) Reclassification	For values that are a reclassification of a gain, the XBRL value will be positive. For values that are a reclassification of a loss, the XBRL value will be negative.
Income	(Expense)	For values reported as income, the XBRL value will be positive. For values reported as an expense, the XBRL value will be negative.
Income	(Loss)	For values reported as income, the XBRL value will be positive. For values reported as a loss, the XBRL value will be negative.
Income Reclassification	(Loss) Reclassification	For values that are a reclassification of income, the XBRL value will be positive. For values that are a reclassification of a loss, the XBRL value will be negative.
Loss or Cost	(Income) or (Credit)	For values reported as a loss or cost, the XBRL value will be positive. For values reported as an income or credit, the XBRL value will be negative. Typically, this has been used with the aggregation elements of the defined benefit plan components.
Tax Expense	(Tax Benefit)	For values reported as a tax expense, the XBRL value will be positive. For values reported as a tax benefit, the XBRL value will be negative.
Tax Expense Reclassification	(Tax Benefit) Reclassification	For values that are a reclassification of a tax expense, the XBRL value will be positive. For values that are a reclassification of a tax benefit the XBRL value will be negative.
Period Increase	Period (Decrease)	For values that are an increase in a period, the XBRL value will be positive. For values that are a decrease in a period, the XBRL value will be negative.

Section 1: Overview of Other Comprehensive Income Taxonomy Element Attributes

Elements included in presentation group *148400 - Statement - Statement of Comprehensive Income* are structured as follows:

OCI line item elements are modeled from an income perspective, except for defined benefit plan elements (see below) and other-than-temporary-impairment losses. The OCI line item elements related to foreign currency transactions and translations, available-for-sale securities adjustments, cash flow hedges, financial liabilities measured under the fair value option, and the excluded component of a derivative designated and qualifying as a hedge, before and after reclassification and before and after income tax, have credit balance attributes, while the elements representing the reclassification adjustment from AOCI have a debit balance attribute. Definitions and standard labels for each element are modeled to be consistent with the corresponding balance type.

The total OCI element related to pension and postretirement benefit plans is modeled from an expense perspective. The amount for defined benefit plans overall would be recognized on the income statement as an expense or reduction of expense. The elements representing the OCI component for defined benefit plans before and after reclassification and before and after income tax have debit balance attributes, while the element representing the reclassification or amortization from AOCI has a credit balance attribute.

Individual categories of OCI activity within defined benefit plans may have different balance attributes than the OCI total for defined benefit plans. The elements for OCI related to actuarial gain (loss) and the transition asset (obligation) are modeled from an income perspective (credit balance type and the reclassification out of AOCI with a debit balance type). The elements for prior service cost (credit) are modeled from an expense perspective (debit balance type and the reclassification out of AOCI with a credit balance type).

Definitions and standard labels for each element are modeled to be consistent with the corresponding balance type. For example, Taxonomy element “Other Comprehensive (Income) Loss, Defined Benefit Plan, before Reclassification Adjustment, after Tax” has a definition reading as “Amount, after tax, before reclassification adjustment, of (increase) decrease in accumulated other comprehensive income of defined benefit plan, that has not been recognized in net periodic benefit cost (credit).”

There are groups of elements for each component of other comprehensive income such as changes related to available-for-sale securities, associated with pension or other postretirement benefits, related to foreign currency adjustments, related to other-than-temporary impairments, related to derivatives qualifying as hedges, and related to financial liabilities measured under the fair value option. These groups have elements that are before and after tax, amounts arising during the period, reclassified out during the period, net of reclassifications, including noncontrolling interest, attributable to the parent and attributable to noncontrolling interest. There are not line item elements for every combination and a dimension may be needed to tag the disclosure. For example, there are not separate line item elements for amounts arising during the period and reclassified out during the period attributable to the parent and attributable to the noncontrolling interest. There are members that can be used with the line item element that includes noncontrolling interest to disaggregate to the specific attributions for the parent and the noncontrolling interest.

The modeling for the disclosures is generally modeled to be consistent with the Statement of Stockholders' Equity. The disclosure for the changes to AOCI is viewed as further detail of the Statement of Stockholders' Equity and has been modeled using dimensions.

Section 2: Primary Financial Statements to Accompany Disclosures

Example 1—Consolidated Statements of Comprehensive Income and Consolidated Statements of Income

This example uses a two-statement approach to illustrate the modeling of changes in AOCI for each OCI component, including reclassifications out of AOCI, in the Statement of Comprehensive Income. The Consolidated Statement of Comprehensive Income is illustrated first because of relevance to the topic.

Entity XYZ
Consolidated Statements of Comprehensive Income
For the Year Ended December 31,

	2018	2017	2016
L1 Net income	\$ 88,750	\$ 79,875	\$ 71,000
Other comprehensive income, net of tax			
Net gain on cash flow hedges			
L2 Net unrealized gain on derivatives arising during period, net of tax	4,000	4,500	5,740
L3 Reclassification of net (gain) loss from AOCI for derivatives, net of tax	(975)	(960)	170
L4 Net unrealized gain for cash flow hedges, net of tax	3,025	3,540	5,910
Net unrealized gain on AFS securities			
L5 Net unrealized holding gain on securities arising during period, net of tax	2,500	1,500	1,000
L6 Reclassification of net gain from AOCI for sale of securities, net of tax	(1,500)	(1,000)	(900)
L7 Net unrealized gain for available-for-sale securities, net of tax	1,000	500	100
Defined benefit pension plans			
L8 Net actuarial loss arising during period, net of tax	(2,300)	(1,600)	(3,000)
L9 Net prior service cost arising during period, net of tax	(700)	(400)	(1,000)
L10 Other comprehensive loss, defined benefit plans, before reclassification adjustments, net of tax	(3,000)	(2,000)	(4,000)
L11 Reclassification of net actuarial loss from AOCI, net of tax	4,000	3,500	4,500
L12 Amortization of net prior service cost from AOCI, net of tax	1,500	1,000	2,000
L13 Reclassification of net transition asset from AOCI, net of tax	(1,000)	(1,000)	(1,000)
L14 Reclassification adjustment for defined benefit plans from AOCI, net of tax	4,500	3,500	5,500
L15 Other comprehensive income, defined benefit plans adjustment, net of tax	1,500	1,500	1,500
Foreign currency translation adjustment			
L16 Foreign currency transaction and translation net gain arising during period, net of tax	3,500	3,500	1,500
L17 Reclassification of foreign currency transaction and translation adjustment from AOCI, realized upon sale or liquidation, net of tax	—	—	—
L18 Foreign currency transaction and translation gain, net of tax	3,500	3,500	1,500
L19 Other comprehensive income, net of tax	9,025	9,040	9,010
L20 Comprehensive income	97,775	88,915	80,010
Less:			
L21 Comprehensive income attributable to the noncontrolling interest	(15,975)	(16,120)	(16,120)
L22 Comprehensive income attributable to XYZ	<u>\$ 81,800</u>	<u>\$ 72,795</u>	<u>\$ 63,890</u>

Figure 1a.3

Notes:

- Figures 1.3, 1.4 and 1a.3 provide information for one reporting period. The other reporting periods would be similarly structured.
- The line items used to model this information assume the election to present the disclosure of changes in AOCI within the Statement of Comprehensive Income.
- All reported OCI fact values in this scenario are “net of tax amount”; therefore, related OCI net of tax elements are used.
- “Net Income (Loss) Available to Common Stockholders, Basic” (L33) was used with the assumption that there are no adjustments for dividends on preferred stock, participating securities or other adjustments to net income.
- Additional guidance for the structure of elements included in presentation group 148400 - *Statement - Statement of Comprehensive Income* can be found under section—[Overview of Other Comprehensive Income Taxonomy Element Attributes](#).

** Preferred Labels are the labels created and used by the company to show the line item captions in its financial statements.

Figure 3.3

Notes:

- Figure 3.3 provides information for one reporting period. The other reporting periods would be similarly structured.
- The number of shares is not dimensionally qualified (no member) as it represents the report-wide (default) value.
- The Statement does not present a total for the parent, but if this is presented, the member “Parent [Member]” (M9) may be used for the values.
- Reclassification of certain tax effects of the Tax Cuts and Jobs Act of 2017 out of AOCI is illustrated for fiscal year 2018.

* Element will be available in the 2019 Taxonomy.

** Preferred Labels are the labels created and used by the company to show the line item captions in its financial statements.

Section 3: Modeling of Disclosures for Changes in Accumulated Other Comprehensive Income (Loss) and Related Tax Effects

Example 4—Disclosure of Changes in Accumulated Other Comprehensive Income (Loss)

This example illustrates the modeling of changes in AOCI, including reclassifications out of AOCI, when presented in the notes to the financial statements. This modeling is consistent with the modeling in the Consolidated Statement of Stockholders' Equity and uses dimensions with the "Stockholders' Equity, Including Portion Attributable to Noncontrolling Interest" (L61) line item element similar to that statement. When an entity has multiple pension components such as actuarial gains/losses, prior service cost/credit, and transition asset/obligation, member elements that represent specific pension components are used in conjunction with reclassification out of AOCI and other OCI line items.

Figure 4.4d

Notes:

- Figures 4.3 and 4.4 provide information for one reporting period. The other reporting periods would be similarly structured.
- Line items are used with related OCI component members under “Equity Components [Axis]” (A1) to model this information if filers elect to disclose in the notes.
- The beginning and ending balances are presented together for illustrative purposes, but would appear in separate contexts in the instance document.
- The members for the beginning and ending balance (L61) for the total of noncontrolling interest is different than the activity (L19, L68, and L69) and the net change (L77*) because the element for the beginning and ending balance “Stockholders’ Equity, Including Portion Attributable to Noncontrolling Interest” (L61) needs to be further identified as relating to AOCI. The elements for the activity “Other Comprehensive Income (Loss), before Reclassifications, Net of Tax” (L68), “Reclassification from Accumulated Other Comprehensive Income, Current Period, Net of Tax” (L69), “Other Comprehensive Income (Loss), Net of Tax” (L19), and the element for the net change “AOCI Including Portion Attributable to Noncontrolling Interest, Period Increase (Decrease)” (L77*) are already identified as OCI. Therefore, the member “AOCI Attributable to Noncontrolling Interest [Member]” (M22) is used with L61 to identify the value is for AOCI for noncontrolling interest. The member “Noncontrolling Interest [Member]” (M21) is used with L19, L68, L69 and L77* to identify it is for noncontrolling interest. The modeling for the activity is the same as the Statement of Stockholders’ Equity.
- Similarly, the beginning and ending balances for the total of AOCI \$(113,000) and \$(89,975), and the total reclassification of tax effects out of AOCI \$14,000, respectively, needs to be further identified as AOCI. The elements used for “Stockholders’ Equity, Including Portion Attributable to Noncontrolling Interest” (L61) and for “Tax Cuts and Jobs Act, Reclassification from AOCI to Retained Earnings, Tax Effect” (L76*) are identified as AOCI by using member “AOCI Including Portion Attributable to Noncontrolling Interest [Member]” (M1). The elements for the activity for L19, L68, L69 and L77* are already identified as OCI by the line item and does not need further identification. They represent the report-wide values for the AOCI activity.

- The member “AOCI Attributable to Parent [Member]” (M10) is used to tag the beginning and ending balance (L61) for the total of parent and the activity (L19, L68, L69, L76* and L77*) which is consistent with the modeling in the Statement of Stockholders’ Equity.
 - With the introduction of the element “Tax Cuts and Jobs Act, Reclassification from AOCI to Retained Earnings, Tax Effect” (L76*), a net change element “AOCI Including Portion Attributable to Noncontrolling Interest, Period Increase (Decrease)” (L77*) was created to reflect the net activity in AOCI. Reclassification adjustments as a component of “Other Comprehensive Income (Loss), Net of Tax” (L19) are to avoid double counting of items in comprehensive income that are presented as a part of net income. “Tax Cuts and Jobs Act, Reclassification from AOCI to Retained Earnings, Tax Effect” (L76*) is a reclassification out of AOCI, but is not a reclassification adjustment and it would not be appropriate to include in the total of “Other Comprehensive Income (Loss), Net of Tax” (L19). If a subtotal of activity for changes in AOCI is provided which includes an amount for “Tax Cuts and Jobs Act, Reclassification from AOCI to Retained Earnings, Tax Effect” (L76*), “AOCI Including Portion Attributable to Noncontrolling Interest, Period Increase (Decrease)” (L77*) is intended to be used for the subtotal.
 - Reclassification of certain tax effects of the Tax Cuts and Jobs Act of 2017 out of AOCI is illustrated for fiscal year 2018.
- * Element will be available in the 2019 Taxonomy.
- ** Preferred Labels are the labels created and used by the company to show the line item captions in its financial statements.

Example 5—Disclosure of Amounts Reclassified Out of Accumulated Other Comprehensive Income (Loss)

This example illustrates the modeling for disclosures of amounts reclassified out of AOCI into net income when presented in the notes to the financial statements. “Reclassification out of Accumulated Other Comprehensive Income [Axis]” (A3) and “Reclassification out of Accumulated Other Comprehensive Income [Member]” (M30) identify the reclassification from AOCI related to the income statement line items. The applicable income statement line item elements are dimensionalized by this axis and member along with the appropriate member from the “Equity Components [Axis]” (A1).

Figure 5.4b

Notes:

- Figures 5.3 and 5.4 provide information for one reporting period. The other reporting periods would be similarly structured.
 - For amounts disclosed in Figure 5.3, income statement line items have been modeled as the primary concepts and tagged with “Reclassification out of Accumulated Other Comprehensive Income [Member]” (M30) under “Reclassification out of Accumulated Other Comprehensive Income [Axis]” (A3) and related OCI component members under “Equity Components [Axis]” (A1). This represents the amounts reclassified into the income statement.
 - A dimensional relationship is used to effectively reflect the disaggregation or attribute identification of a primary concept (income statement line items).
- ** Preferred Labels are the labels created and used by the company to show the line item captions in its financial statements.

Example 6—Disclosure of Tax Effects on Other Comprehensive Income (Loss)

This example illustrates the modeling for disclosures of the tax effects on OCI.

The tax effects of the components of other comprehensive income are as follows:						
For the Year Ended December 31,						
2018						
	Before tax amount		Tax (expense) benefit		Net of tax amount	
Net gain on cash flow hedges						
Net unrealized gain on derivatives arising during period	L75, A1:M3 \$ 5,000		L74, A1:M3 \$ (1,000)		L68, A1:M3 \$ 4,000	
Reclassification of net gain from AOCI for derivatives	L70, A1:M3 (750)		L71, A1:M3 (225)		L69, A1:M3 (975)	
Net unrealized gain for cash flow hedges	L72, A1:M3 4,250		L73, A1:M3 (1,225)		L19, A1:M3 3,025	
Net unrealized gain on AFS securities						
Net unrealized holding gain on securities arising during period	L75, A1:M2 3,200		L74, A1:M2 (700)		L68, A1:M2 2,500	
Reclassification of net gain from AOCI for sale of securities	L70, A1:M2 (1,000)		L71, A1:M2 (500)		L69, A1:M2 (1,500)	
Net unrealized gain for available-for-sale securities	L72, A1:M2 2,200		L73, A1:M2 (1,200)		L19, A1:M2 1,000	
Defined benefit pension plans adjustment						
Net prior service cost arising during period	L75, A1:M7 (800)		L74, A1:M7 100		L68, A1:M7 (700)	
Amortization of net prior service cost from AOCI	L70, A1:M7 2,000		L71, A1:M7 (500)		L69, A1:M7 1,500	
Net prior service cost	L72, A1:M7 1,200		L73, A1:M7 (400)		L19, A1:M7 800	
Net actuarial loss arising during period	L75, A1:M6 (2,700)		L74, A1:M6 400		L68, A1:M6 (2,300)	
Reclassification of net actuarial loss from AOCI	L70, A1:M6 4,500		L71, A1:M6 (500)		L69, A1:M6 4,000

Figure 6.4d

Notes:

- Figures 6.3 and 6.4 provide information for one reporting period. The other reporting periods would be similarly structured.
 - The members for AOCI including the portion attributable to noncontrolling interest are used as the presentation indicates the values include noncontrolling interest.
 - The values for the total OCI net of tax (L19) are the same values in Figure 1.1.
- ** Preferred Labels are the labels created and used by the company to show the line item captions in its financial statements.
